To Whom It May Concern

I am writing to express my support for Care 360's grant application through the Queensland Governments Ignite Ideas Fund.

Care 360 is the most comprehensive Residential Aged care database in the country supporting experts to find the best fit Residential Aged care solution for their clients.

Age care planning can be complex and stressful, Care 360 aims to simplify the process, increase understanding and reduce stress making a difference to the lives of aging Australians and their families.

Accordingly, this application carries my full support and I wish Care 360 every success.

Yours sincerely
