To Whom It May Concern

**Re: Care360**

I am writing to support Care360 in its IGNITE funding application. Care360 aims to provide a comprehensive comparison site designed to change the way families source appropriate aged care and also to assist hospitals with helping patients move to appropriate longer term solutions quicker and with less stress for families.

I have met with the founders of Care360 on a number of occasions and commend their commitment to making a difference for Queenslanders and Australians seeking Aged Care solutions.

Care360 aims to change the way families source appropriate care for loved ones, and also seeks to assist hospitals with facilitating patients' move to appropriate longer term solutions in a more timely manner.

It is very likely that Care360 could be a world leader in bringing real positive change to this sector, with benefits to the health sector such as economic efficiency, transparency, and independence in decision-making.

I would like to wish Care360 and its founders well in their application for funding, and will watch this initiative with much interest.

Yours sincerely

**Hon Dr Anthony Lynham MP**
